

## Company Profile

Nationwide Fire Protection designs, supplies and installs full-spectrum Fire Protection Systems to meet your specific needs. All design and installation is completed by our own staff with the experience, expertise and ingenuity to meet your requirements no matter the size or complexity of the job.

With substantial experience in the Wellington region our work speaks for itself in terms of high quality and responsive service. We also provide comprehensive maintenance and testing services for over 200 individual sites in the Wellington area. We have a loyal customer base who will confirm the quality of our work. This number is constantly growing as we install new systems throughout the lower North Island.

In selecting systems we have access to the best products from multiple suppliers. This product choice ensures we install the best system for each job and provides unrestricted future flexibility.

### ***Our services include:***

#### **Automatic Fire Sprinkler Systems**

Without doubt the most effective method of protecting property against the threat of fire. Nationwide Fire Protection offers sprinkler installations ranging from large-scale industrial and commercial systems, apartment buildings, residential systems, wet systems, deluge systems and specialised designs. We also test and maintain existing sprinkler installations to ensure they are operating correctly.

#### **Fire Alarm and Smoke Detection Systems**

Fire Detection systems provide an early warning of a fire, allowing people to be safely evacuated before a life-threatening situation can develop. We install the latest fire alarm technology available from our suppliers, and continually strive to eliminate false alarms through engineered solutions and superior installation and configuration.

#### **Special Hazard Systems**

Equipment and processes in industry often require specifically designed fire protection e.g. preaction systems, deluge systems, gas flood systems, Vesda systems. Nationwide Fire Protection has considerable experience in design and installation of these specialised systems.

## **Fire Equipment**

Our access to suppliers ensures that you are provided with high-quality, cost-effective fire extinguishers, hose reels, fire blankets alarms and signage. We also perform testing and maintenance of existing equipment.

## **Passive Fire Protection**

We are IQP certified for all passive features on your Building Warrant of Fitness. These features are as follows:

- Emergency Lighting
- Signs
- Means of Escape
- Safety Barriers
- Disabled Access & Signage

## **Fire Appliance**

We are the only fire protection company in Wellington with an operational Fire Truck.

This fire truck is used for:

- Fire Hydrant systems in building testing, as required by NZS4510
- Street Hydrant flow testing.
- Pressurising New Fire Systems at Commissioning stages

## **IQP Testing & Maintenance**

Nationwide Fire Protection staff have IQP (Independent Qualified Person) status. We can ensure that your total needs for testing and maintenance are met in relation to the requirements of the Building Act 2004.

***All of our clients are supported by 24 hour, 365 day emergency callout cover.***

## Site Examples

## **Why Choose Nationwide ?**

***“Quality and Cost Effective Fire Protection of People and Property”***

### **We are cost effective**

We don't have the layers of decision making and overheads of the multinationals.

### **We are responsive**

Our structure and communication systems ensure prompt response and provide a 24-hour callout.

### **Our quality work is completed by our own staff**

Our work ethic demands and ensures quality and client satisfaction. We don't use subcontract labour.

### **We are technically proficient**

Nationwide is ISO 9000 accredited. Members of our team are NZCE (Mechanical Engineering) qualified, BSC Chem, BCA, and IQP (independent Qualified Person) registered. Dedicated AutoCAD operator and sophisticated Hydroponics specialists support the team.

### **Product Choice**

In selecting systems we have access to the best of product from a multitude of suppliers. This product choice ensures unrestricted future flexibility.

### **We are locally owned and operated.**

### **Why did we establish Nationwide and it's associated companies?**

“I completed my cadetship with a multinational. The opportunities and the need for an efficient, independent, client focused competitor intent on the enhancement of Industry standards motivated the establishment in 1999 of what is now Nationwide Fire Protection Ltd. The diversity of our existing client base illustrates the reality of that vision”.

Jeff Ward
